

Figure 1: A scatter plot showing the support of the posterior distribution for the parameters x_1 and x_2 . The x-axis is labeled x_1 and ranges from -3 to 3. The y-axis is labeled x_2 and ranges from -3 to 3. The plot shows two clusters of points: one cluster of blue points ($x=+1$) and one cluster of red points ($x=-1$). The support of the posterior distribution is indicated by two dashed lines forming a V-shape, and the support of the prior distribution is indicated by a solid black line.
